SUMMARY

Full stack software engineer delivering production code in a highly regulated fintech environment. Led automation work that eliminated manual configuration errors, reduced compliance risk, and improved reliability across transaction-critical workflows. Recognized in 2025 performance reviews as the team's highest-performing developer. Uses LLM-driven development flows to ship faster, debug deeper, and deliver with exceptional effectiveness. Seeking a product-focused engineering role building reliable, high-impact software.

TECHNICAL SKILLS

Languages: JavaScript, TypeScript, HTML, CSS, Python, Bash
Frontend: React, Next.js, Tailwind CSS, shadcn/ui, component architecture, responsive UI, accessibility, Vue.js
Backend: Node.js, Express.js, REST APIs, MongoDB, json-rules-engine, authentication, RBAC, transactional email
Cloud & Tools: AWS, GCP, Docker, Vercel, Resend, Git, GitHub, npm, CI/CD
Testing: Playwright, Vitest, QA automation, integration testing, end-to-end regression testing, BTM simulators
Product & Operations: Jira, Amplitude, Mezmo, Grafana, Slack, Loom demos, production troubleshooting, incident response, log analysis
AI Workflows: LLM-assisted debugging, AI-assisted development, rapid prototyping, refactoring, code review acceleration

EXPERIENCE

Full Stack Software Engineer | Bitcoin Depot **June 2024 - Present**
Remote, Ottawa, ON

- Automated legacy configuration logic for transaction-critical flows, eliminating 100% of manual configuration errors and reducing compliance risk.
- Led state-based regulatory projects tailoring custom UI and UX across a Bitcoin ATM fleet generating \$600M+ in annual company revenue.
- Upgraded repos from Node 18 to 20, improving dependency compatibility, platform security, and build/test performance by an estimated 10-15%.
- Reduced QA rework by performing full-flow regression testing before commits, recording demos, and validating fixes against simulators.
- Increased work velocity by an estimated 30% by leveraging LLM-assisted workflows for planning, implementation, testing, and debugging.
- Recognized as the team's highest-performing developer in 2025 performance reviews for productivity, execution quality, and engineering impact.

QA Software Engineer | Bitcoin Depot **May 2023 - June 2024**
Remote, Ottawa, ON

- Increased release confidence across a network of 9,000+ kiosks by validating frontend, backend, simulator, and admin-panel behavior end to end.
- Improved QA throughput by enabling remote BTM simulator testing, saving 20 minutes per hour compared to testing on physical hardware.
- Reduced engineering investigation time by crafting tickets with logs, reproduction steps, analytics context, screenshots, and suspected failure points.
- Supported regression, smoke, and acceptance testing for workflows tied to millions of customer transactions across Bitcoin Depot's BTM fleet.
- Served as a go-to technical troubleshooter for production escalations, rollout incidents, and cross-functional incident investigations.

Technical Operations Lead | Bitaccess, acquired by Bitcoin Depot **Jul 2021 - May 2023**
Remote, Ottawa, ON

- Technical lead for Bitaccess' Linux-based fleet of machines, connecting over SSH, reading logs, executing commands, and validating device state.
- Led onboarding of Bitcoin Depot as a strategic enterprise client onto the Bitaccess platform which scaled monthly company revenue to \$50M+.
- Served as lead operator on Bitcoin Depot's regional rollouts across Canada, Australia, Hong Kong, Brazil, and Mexico.
- Investigated production issues using Mezmo, Grafana, Amplitude, admin panels, transaction data, and machine logs.

PROJECTS

Faceout | Founder | Next.js, React, TypeScript, Tailwind, Vercel, Resend, Vitest

- Founded and built a web studio platform for local-business websites, SEO, and Google Business Profile management.
- Generating \$1K/MRR from ongoing website and GBP management.

PermiPro | Founding Engineer | Municipal permit SaaS

- A municipal permit platform that cuts administrative costs by 60% and reduces turnaround time by 75%.
- Built core SaaS infrastructure including authentication, role-based permissions, transactional email, multi-step forms, and workflow automation.

EDUCATION

Bachelor of Commerce, Finance | Dalhousie University 2020
